

MONARCH *Cypress*

We recommend the following care for microfiber and waffle robes with terry or polyester linings:

Wash in warm water and dry on medium or permanent press setting. Remove promptly from the dryer while ever so slightly damp and hang. The weight of the robe will pull out any residual wrinkles. While it isn't necessary to turn the robe inside out for laundering, turning the terry or plush side out will make it easier to remove any makeup or soil on the collar during the wash cycle and will allow the robe to dry more quickly.

The following specifications are followed in our in-house wash testing lab:

- washer is set for a mix wash (hot and cold water running simultaneously)
- solvent based, high alkaline liquid laundry detergent is recommended.
- dryer is set at NO MORE than 50 degrees for polyester plush lined (to prevent melting) and 70 degrees for cotton/poly terry lined.
- machines are run at 75% - 100% capacity
- dryer sheets or anti-static liquid product can be used when laundering double-faced robes to reduce/prevent static between inner and outer lining.
